You must score 70% (7/10) or greater on this ten (10) question quiz to receive your CME credit.

“Working with Medical Students with Difficulties” Vol 1, No 3

✓ *Check mark your answers for each question*

1. In regards to alcoholism, medical students and residents have rates that are:

- ½ of that of the general population
- Similar to the general population
- Twice the rate of the general population
- Three times the rate of the general population

2. Mental illness may cause physician impairment that threatens patient safety, with the rate being:

- Lower than substance abuse
- The same as substance abuse
- Twice that of substance abuse
- Four times that of substance abuse

3. First year medical students self evaluations of themselves tend to be:

- More critical of themselves than faculty evaluations
- Less critical of themselves than faculty evaluations
- Similar in nature to that of faculty evaluations
- Positive in regards to the evaluations of faculty

4. In regards to routine urine drug screening in medical education:

- Overall inexpensive
- Effectiveness is clear
- Controversial
- Has been clearly defined

5. Primary Prevention of student problems:

- Done through a well defined curriculum with large steps involved
- Begins early with the selection and admission process
- Vigilant and targeted feedback should be instituted at the beginning of clinical rotations
- Are best achieved through a educational system with strong and structured rules in place

6. When remediating deficiencies in professionalism, one must focus on:

- Changing underlying attitudes
- Changing motivating factors
- Changing students perceived goals and future accomplishments
- Changing student behaviors

7. In respect to alcohol and drug addiction programs, physicians are:

- More likely than the general population to respond positively
- Less likely than the general population to respond positively
- Less likely than the general population to enter such programs
- Less likely than the general population to finish such programs

8. In respect to learner “learning disabilities’ as they relate to medical school:

- Private examination rooms are most needed
- Most students require an additional year to complete total course work
- Examination accommodations most often require extra time
- Most students will require at least one tutor for assistance within the program

9. In regards to negative assessments and dismissal from medical schools, courts will generally:

- Side with the student
- Side with the school based on the fact that it is an institution of higher learning
- Side with the school even if capriciousness is noted
- Side with the school if it can show it followed due process

10. Within a setting of a student rotation, reasonable accommodations must be provided for:

- all disabilities
- those disabilities that are a threat to the patient’s welfare
- Only those disabilities that have been made known to the college and requested
- Those disabilities that place the student at a hardship in relation to the rest of a class
