

Keeping U Healthy Keeps LMU Healthy!

Important Points for Dining Hall Staff:

- Hand sanitizer will be provided for each table in the dining hall. Email amy.drittler@lmunet.edu if you run out. Hand sanitizer must remain on each table at all times. Encourage students to use the sanitizer.
- Make sure the **Cover Your Cough** posters stay up at each doorway into the dining hall. If you need replacements, send an email to amy.drittler@lmunet.edu.
- Be a good role model for the students:
 - Wash your hands frequently.
 - **Cover Your Cough!**
- As part of daily cleaning, disinfect doorknobs, appliance handles, keyboards, remote controls, chairs, tabletops and any other surfaces that are frequently used.
- If someone in the dining hall displays flu-like symptoms, **call Security at 423-526-7911 for transportation.** Ask the student the following:
 - Do you have a fever? Do you have a cough?
 - If the student answers YES, alert the transportation staff. They will provide the student a surgical mask to wear during the transport.
 - Make sure the transport staff also wears surgical masks and has hand sanitizers as they transport the student.
 - Make sure the transport staff knows to **alert the Department of Outpatient Services** that they are on their way.
 - Call a doctor immediately if a student has trouble breathing, pain in the chest or abdomen, sudden dizziness or confusion.
- If you are dining hall staff and develop flu-like symptoms:
 - ISOLATE YOURSELF IMMEDIATELY. Do not work in food service until you have been symptom-free for 7 days after a positive diagnosis or for 24 hours after symptoms disappear, whichever is longer.
