Hello,

This is the link that will give you information as to what devices will be acceptable during your time as a student (http://www.lmunet.edu/administration/information-services/bring-your-own-device-byod). If you have specific questions concerning this policy, please contact the helpdesk at 423-869-7411. Please also check back to this site as it may be updated with additional information periodically.

In addition, it is a requirement that your device be equipped with a privacy filter, 3M is our recommendation. Each student should purchase a size compatible with the device being used during examinations. The privacy filters may be removed when not testing but will be required during examinations. No student will be allowed to take an exam without a privacy screen. Note these are NOT screen protectors or antiglare but are for privacy. They will turn the screen black when viewed from an angle.

Description: 3M Privacy Filters keep confidential information private. Only persons directly in front of the monitor can see the image on screen; others on either side of them see a darkened screen.
