## Program: B.S. in Civil Engineering

The Civil Engineering program offering the Bachelor of Science in Civil Engineering degree at Lincoln Memorial University will offer the students preparation to pursue Professional Engineering licensure post-graduation. The steps for achieving Professional Engineering licensure varies for each state, but the steps are similar and consist of 4 elements. Students must graduate from an ABET accredited program, pass the Fundamentals of Engineering (FE) exam prior to or immediately following graduation, work under the direct supervision of a licensed Professional Engineer, and finally apply for and pass the Principles and Practice of Engineering (PE) exam before earning Professional Engineering licensure.

The Civil Engineering program is not currently ABET accredited. ABET will only review a program once students have graduated from the program. Therefore, the civil engineering program will pursue ABET accreditation in the fall of 2026, following the graduation of the first cohort entering college in the fall of 2022. Upon successfully earning accreditation, ABET will back-date the accreditation for the program prior to the first graduates. This will ensure that all graduates from the program will be eligible to pursue Professional Engineering licensure.

LMU Contact for questions about licensure or certification: Ryan Overton, <u>ryan.overton@lmunet.edu</u> , 423-869-6352

The State Licensing Requirements should indicate if the program curriculum *Meets* the requirements in these states and US Territories, *Does NOT Meet* the requirement in these states and US Territories or *Undetermined* if the program has not yet determined if the curriculum requirements are met for these states and US Territories.
